

Advanced Therapy Medicinal Products Short Courses

‘Introduction to Advanced Therapy Medicinal Products’

The University of Manchester is offering the ‘Introduction to Advanced Therapy Medicinal Products’ unit as a stand alone short course or MSc module for healthcare professionals (medical, pharmaceutical, nursing and biotech) & non-clinical scientists. Two options are available:

1. Complete lectures & academic assessments to gain 15 level 7 credits
2. Complete lectures only to gain CPD points (28 points applied for)

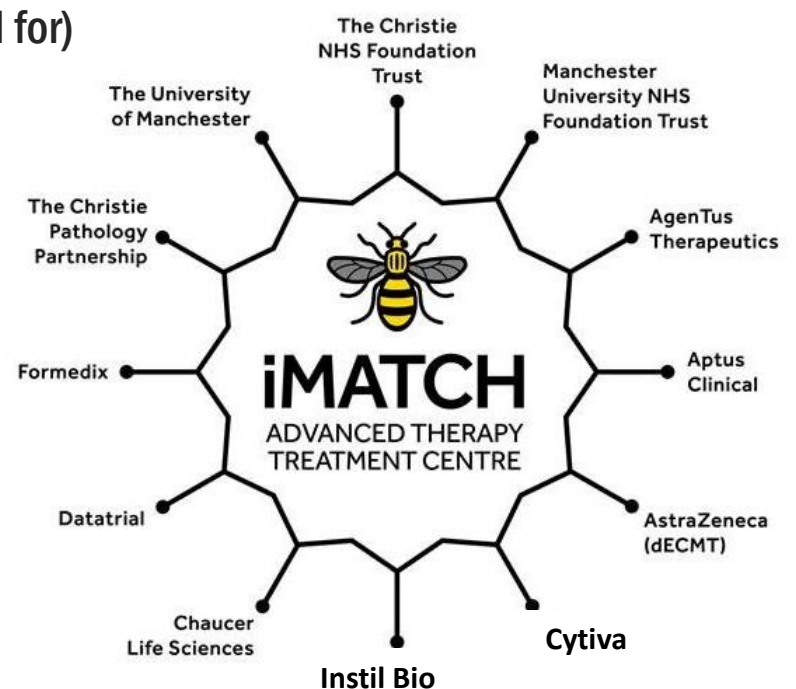

Unit Overview

- Advanced Therapy Medicinal Products (ATMPs) incorporating cell and gene therapy, offer new and exciting treatment potential for high-burden diseases. ATMP development has unique considerations and complexities at every stage in the process, from pre-clinical and trial development, to licencing and clinical delivery. This exciting new course aims to give you insight and understanding across the complete pathway allowing you to become familiar with key requirements of ATMP development from bench to bedside
- For detailed programme, follow this link:
